

TOWARDS THE FUTURE, TOGETHER...

As Tekfen Construction, we have participated in many important energy projects in Azerbaijan since 1995. Projects in the ACG and Shah Deniz fields, our involvement in Sangachal, our participation in the CWP, PCW, COP and Shah Deniz 2 Platforms, our presence in the country and contributions to projects have been ongoing continuously for 26 years.

Inspired by the famous phrase “Two States - One nation” in partnership with SOCAR, Azfen was established in 1996 and its continuous existence today as a strong and independent company.

As Azfen's entry into the sector began with small-scale construction projects, over time transferred TEKFEN's knowledge and way of doing business have formed local teams and staff, experiences have been gained, making Azfen the major contractor in the Country's leading project.

Azfen continues to operate not only in Azerbaijan but also in Georgia and works as a solution partner for key participants in the sector such as BP.

Tekfen Construction, which has left 26 years behind in serving the Country's development according to Azerbaijan's 2025 target, is also pleased to support the Country's localization strategy for the future, along with Azfen, which has grown with its own knowledge and created its own brand.

Thank you...
