

Grow your business with SHERP

Obstacles do not block the path, they are the path!

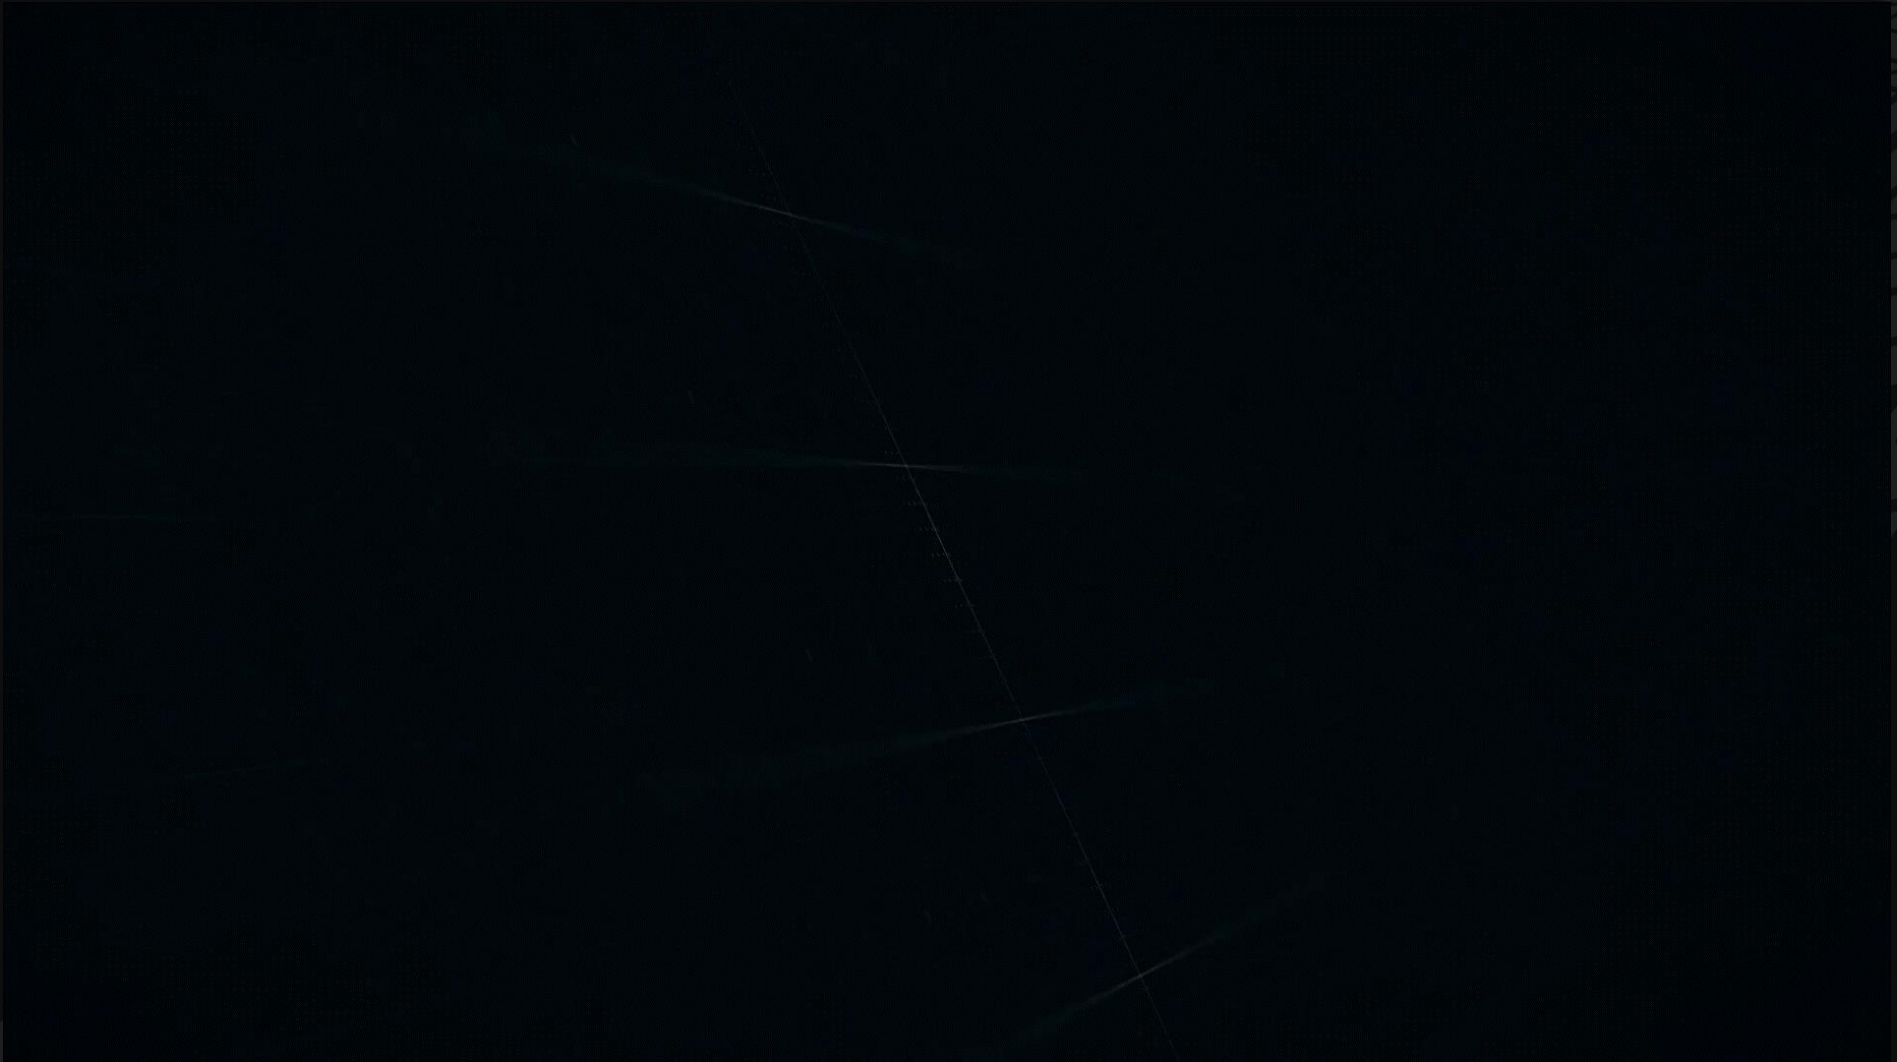

Our position

The world would be a better place if we had more confidence to overcome obstacles on our way.

Demo SHERP Pro and SHERP the Ark

we overcome

Who we are

QUADRO INTERNATIONAL is a company with international quality standards certificate ISO 9001.

The first SHERP all-terrain vehicle was produced and presented in 2012.

It took us 20 years to develop a reliable amphibian all-terrain vehicle.

2015 the plant was based in Kyiv, Ukraine.

2016 the British TopGear auto show called SHERP "a tank for two."

2017 SHERP opened its North American office in Winnipeg, Canada.

2018 SHERP became an official provider for UN.

First contracts signed with companies from Fortune 500 list.

2019 SHERP was recognized as the most effective vehicle for UN.

The economic effect made up a sum of 1.7 million dollars for 1.5 months while investments amounted to 500k.

2019 new SHERP the Ark was launched.

48 Dealers in 25 countries on all continents

SHERP partnership

All SHERP equipment and optional equipment is manufactured by worldwide premium manufacturers:

DOCOL®
HIGH STRENGTH STEEL

Parts are made of DOCOL steel, which is resistant to deformation due to high yield strength (1000 MPa), which indicates its strength and resistance to deformation. All parts of the mechanism have a zinc coating, which extends the service life by 30 years.

Kubota

The heart of SHERP all-terrain vehicle is the engine of the Japanese company Kubota, which has specialized in the manufacture of high-tech diesel engines for 120 years. Not a single fault was detected throughout the whole time of using Kubota engines on our all-terrain vehicles.

RAPTOR

The exterior coating of the all-terrain vehicle is Raptor polyurethane paint. This type of coating has soundproof and water repellent properties. Professional paint Raptor protects against mechanical damage, corrosion, mould, chemical exposure (fuel, machine oil).

DOOSAN

The heart of the SHERP the Ark Doosan Infracore Engine Business Group develops and manufactures eco-friendly, high efficient and optimum performance engines, giving top priority to customer satisfaction and aiming to add value to customer and as well as environment.

The transmission is equipped with a manual gearbox RENAULT (JR5), which has shown its best side in terms of reliability, smooth shifting and gear ratios.

Obstacles do not block the path, they are the path!
