

Learning Through Experience

Location : MEXICO

Incident Type : LOST TIME INJURY

Date: 25/06/2016

What happened?

The worker was supporting the activities of unloading of wooden skids for the pipes. Skids were stacked on the low bed trailer. The worker was too near to edge of the platform and at the moment to pull the supports, he lost his balance and fell to the ground.

Incident location

Why did it happen?

The worker was placed on the edge of the platform, in a hazardous condition.

How can we prevent recurrence of similar incidents?

Metallic hooks are available that allow to pull the skids without the need to do it from above the platform of the truck.

Ensure a JSA is carried out before starting work.

Ensure the right equipment is available.

Ensure workers are trained on the job to be done.

Ensure tool box is carried out before starting of the activities.

Ensure adequate supervision.

Ensure that a procedure for the consequence management is applied on the project.

HSE – is not just what you say, it's what you do!
