## Plenary Sessions

---

### 2011-2012 Mission Statement:

“To collect and present state of the art technology in pipeline construction, with the purpose to foster a collaborative and innovative discussion between all the industry players to achieve: Safer, faster, and cost effective pipeline construction through physically and environmentally sound engineering practises.”

# Novel Construction Initiative

## Plenary Sessions

---

### Guiding Principles:

1. Promote co-operative relationships between:
  1. Oil & Gas Investors and Owners
  2. Designers and Contractors
  3. Suppliers and Manufacturers of the Industry
2. Improve Projects preparation and execution processes.
3. Increase competitiveness through:
  1. Sound Engineering & Construction practices
  2. New Technologies and Innovative solutions
  3. High quality construction
  4. Better, safer and environmentally sound activities
4. Produce documents to guide execution in this direction

### Road to Success Project Phases

Phase I	Initiate the collaboration and produce the 1st Edition of the RTS	Completed in Sep 2009
Phase II	Review the RTS, improving consistency, quality and presentation of the content. Collaborate on new chapters and release 2 <sup>nd</sup> Edition	Completed in Sep 2011
Phase III	Further collaboration, develop new chapters and improve existing ones. Re-involve clients	Completed in Sep 2013
Phase IV	Complete work being developed. Focalize more in promoting New Technology.	In action
