

NOVEL CONSTRUCTION GROUP
OVERALL INITIATIVE
MISSION STATEMENT

“To collect and present state of the art technology in pipeline construction, with the purpose to foster a collaborative and innovative discussion between all the industry players to achieve; safer, faster and cost effective pipeline construction through physically and environmentally sound engineering practices.”

GUIDING PRINCIPLES

- Promote co-operative relationships between:
 - o Oil & Gas Investors and Owners
 - o Designers and Contractors
 - o Suppliers and Manufacturers of the Industry
- Improve Projects preparation and executions processes
- Increase competitiveness through:
 - o Sound Engineering & Construction practices
 - o New Technologies and Innovative solutions
 - o High quality construction
 - o Better, safer and environmentally sound activities
- Produce documents to guide executions in this direction

DELIVERY MECHANISM

This will be achieved through the following working groups overseen by an IPLOCA Steering Group:

- Planning and Design Process (P&D)
- New Trends and Innovation (NT&I)
- Welding & Testing (W&T)
- Coatings (C)
- Earthworks & Crossings (E&C)
- Logistics (L)
- Environment (E)

The purpose of the Steering Group will be to coordinate the activities of the working groups and ensure deliverables from each group are aligned with each other and with the overall goals.
