SAIPEM'S ENVIRONMENTAL COMMITMENT

Constant improvement in environmental performance

Saipem's commitment to climate change prevention and environmental protection is reflected in its governance, its principles and policies. The company pursues strategies designed to:

- Reduce all types of environmental impacts as well as to ensure the preservation of natural resources.
- Promotion of widespread environmental awareness and the adoption of best practices on all Saipem projects and sites, including the implementation of initiatives to prevent pollution and to encourage energy and water saving as well as the reuse and recycling of waste.
- Saipem maintains its commitment to reduce environmental damage, pollution and adverse impacts by conducting Research & Development programmes, performing environmental monitoring activities and implementing a wide range of mitigation measures.

SAIPEM - ERSAI Caspian Contractor LLP

Partnering towards a better Environment

Ersai as Joint Venture of Saipem and the Kazakhstan business group ERC Holdings. Local Content is their critical market differentiator that creates strong competitive advantage among other companies. Particular care is devoted in order to create conditions which allow growing of local employees as well as local industrial enterprises within the Republic of Kazakhstan. The mission of Saipem Companies in Kazakhstan is to remunerate capital investments and to be beneficial to local communities through growing in competence and efficiency.

ENVIRONMENTAL CONDITION IMPROVEMENT ACTIVITIES

Improving environmental knowledge of Kuryk community

Saipem ERSAI has been performing local community initiatives in various areas of intervention. Regarding the Environmental area the company has executed the *"Improving environmental knowledge of Kuryk community"* with a 2018 total spending of 2.03 k€, *benefiting almost 10,000 individuals* of Kuryk village local community.

The initiative is also part of the Saipem's commitment to achieving the *United Nations Sustainable Development Goals*, in particular contributing to the goals:

In particular the initiative supports the following *UNGC Environment* principles:

Principle 7: Businesses should support a precautionary approach to environmental challenges;

Principle 8: undertake initiatives to promote greater environmental responsibility; and

Principle 9: encourage the development and diffusion of environmentally friendly technologies.
