All chapters “ready”

- 8.1 Pipe logistics
- 8.2 Fuel management;
- 8.3 Customs;
- 8.4 Camp / catering;
- 8.5 Waste management;
- 8.6 Communications – 8.6.8.2 in proof reading
- 8.7 Lifting;
- 8.8 Products logistic traceability;
- 8.9 Used Tires;

Status

All “ready” status but:

- 8.6.8.2 : Remote maintenance – final review
- 8.7 Lifting chapter – Ready for proof reading
- 8.8 : Traceability - Ready (but empty?)
- 8.9 Used tires - Ready for proof reading

Proof reading is on going and should be completed before the 2023 fall session

Review of published content:

CHAPTER	Update required	TARGET DATE
8.8 Traceability	We lost track of this section (empty?). Suggest that we move it to section 9 (welding). Diane Romero from Petro IT could provide some content on this subject.	November 2023

- Way forward for the group ?

Suggestions to be considered:

- Energy storage on camp sites (Hydrogen, batteries, battery chargers...)
- Solar, wind, hydro for power generation on base camps

The group decided to review thoroughly the content by the next spring session and amend the content next time.

- Thanks for your attention
