LATIN AMERICA

Relevant information and newsletters Latin America...

[READ MORE](#)

1) Measurement of Content Engagement

Start by systematically measuring article access with metrics like views, clicks, and visitor data to establish a baseline.

2) Visibility Monitoring

Evaluate engagement against targets to gauge members' interest.

3) Multi-Channel Amplification

Amplify reach via email, social media, and newsletters.

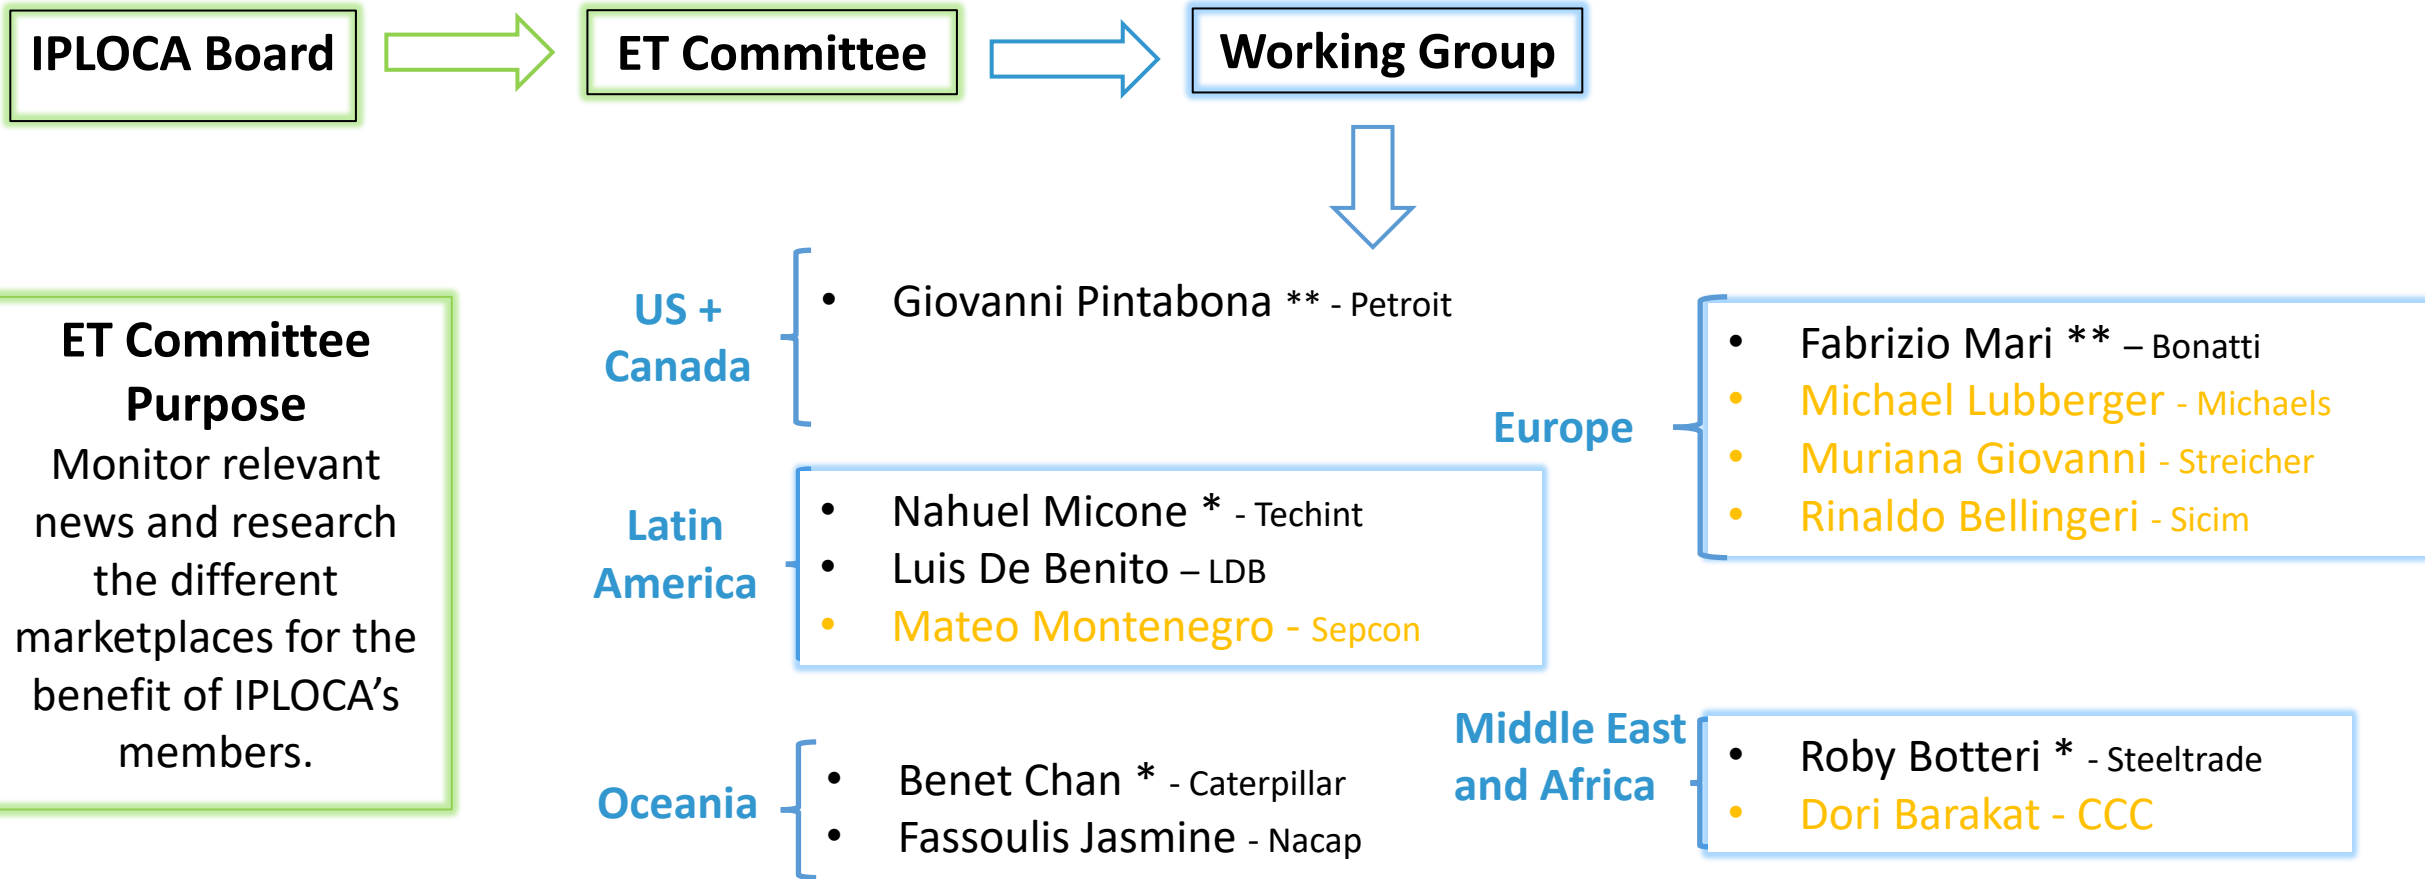

4) Continuous Monitoring and Improvement

Measure performance after amplification to validate impact and refine communication strategy continuously.

Progress Review | Actions Log

Pending	
Invite NextGen members to be part of the working group.	March, 2026
Follow up on the evolution of the information gathering process and its value for IPLOCA Members.	May, 2026
Explore further engagement with INGAA on ET Topics.	June, 2026
Ongoing	
Recruit new collaborators for the ET Working Group, especially in the US & Canada, Europe, and the Middle East & Africa. Promote further participation from non-active collaborators in those regions and in Latin America.	October, 2026
Share Bonatti's energy-transition-related experience and projects with the Board.	December, 2026

ET Working Group Updates

Are we fine with ET Purpose?

Non-Active Members
Anybody else to support US+Canada, Europe or Middle East?

IPLOCA Board Contributions to Energy Transition

1. Each board member is invited to **check IPLOCA's Energy Transition Webpage & MN&I Reports.**
2. Each region should have, at least, **2 collaborative members.** Regional board members are kindly requested to suggest candidates pertaining to their region.
3. Any **energy transition experience/project** to share for the rest of the Board?
4. Any **article/topic** suggested for oncoming newsletters (news, analyses, debates)?
5. Any **speaker** to suggest for oncoming forums (Novel Sessions, Regional Meetings)?
6. Any further ideas to increase **Value to members** in connection to energy transition streamlines?
7. Any further ideas to **gauge and increase members' interest** on shared news (MN&I)?
8. Any further ideas to promote **Engagement** in any other energy transition endeavor?
9. Any **External Company/Organization** to suggest that could add value to IPLOCA ET efforts (such as: INGAA in the US – EPA or APGA in Australia)?

Joint Reflection & ET Committee Proposal

1. ET Committee Purpose has already been achieved with MN&I Initiative.
 2. ET pace is slowing down, although it is necessary for the global environment protection and there are still some initiatives moving forward across several industries.
 3. Board has instructed that there is no need for the ET Committee to participate in the organization of the Novel Sessions, since this activity is already governed by the Novel Session Steering Group and the Industry Influences Working Group.
- Options proposed by the ET Committee for Board decision:
- **Option A:** The Novel Session / Industry Influences Working Group should present its energy-transition-related initiatives and programs to the ET Committee before implementation.
 - **Option B:** Merge the ET Committee with another governance body, such as the Innovation Committee or the Novel Construction Steering Group.
 - **Option C:** Any other option that the Board and/or the IPLOCA President may deem appropriate.

Thank you!!

BOARD SESSION | SEPTEMBER, 2026
